

Xaroar Compiler

DESCRIPTION

Xaroar, an online platform that will compile the codes online, written by developers in an efficient environment. This project aims to redefine the way code is written, tested, and shared, making the development process more accessible, collaborative, and productive. It will provide fast and immediate code compilation and execution within the platform for quick feedback.

KEY IDEAS

This project will help the developers to collaborate in real-time, edit code simultaneously, and see instant changes made by team members. It will have seamless integration with popular version control systems (e.g. Git) for efficient code management and collaboration.
